

Ph.D. program in Humanics

Entrance examination in August 2021

Examination

Screening by application documents.

General Admission

Candidates

Candidates for this Ph.D. program are students who have studied either biomedical sciences or physical sciences/engineering/informatics, and who are willing to study the other discipline and fuse them together.

Oral examination 1:

Oral examination 1 concerns basic knowledge of biomedical sciences and physical sciences/engineering/informatics. Questions are given in English, and you have to explain the answers in English. After your explanation, interviewers ask details of your answers in English or Japanese.

Oral examination 2:

Oral examination 2 concerns your research project proposal upon admission, and your career plan. You can use a projector (with connecting your own PC). The research project proposal must be an interdisciplinary research integrating biomedical sciences and physical sciences/engineering/informatics. The presentation and interview are conducted in English or Japanese.

Special Selection of Working Individuals

Candidates

Candidates for this Ph.D. program must have at least two years of full-time or part-time research experience either biomedical sciences or physical sciences/engineering/informatics, and who are willing to study the other discipline and fuse them together. People who have worked as a physician or an engineer are also very welcome.

Oral examination:

Oral examination concerns your research project proposal upon admission, and your

career plan. You can use a projector (with connecting your own PC). The research project proposal must be an interdisciplinary research integrating biomedical sciences and physical sciences/engineering/informatics. The presentation and interview are conducted in English or Japanese.

Because the above styles of the oral examinations might be changed, please check the latest application guideline.
